

# MULTIFUNCTIONAL CENTER

## CHILDREN

# Support, day care & stay

## FOR WHOM

Our multifunctional center (MFC) supports **children** aged 2.5 to 13 years with a (neuro)motor disability.

## OUR EXPERT TEAM

Our multidisciplinary team consists of several colleagues who work closely together.

- Occupational therapists, speech therapists and physiotherapists
- Orthopedagogues
- Community supervisors
- Nurses and doctors
- Social service

## LET'S MEET

We try to identify your child's support needs through a personal introduction. Together we find out how we can meet your needs.

We work closely together with Basisonderwijs Dominiek Savio (primary education).

## WHAT WE DO

Depending on what your child and your family need, we can provide:

- **General support:** in our center or at your home
- **Day care:** therapy and specific support during the day
- **Stay:** during school weeks, at weekends or during the holidays

“

*Our daughter spends the Wednesday afternoons in the MFC. Her therapy is varied with fun activities and adapted to her needs.*
